B2smart

Oman Oil Marketing embarks with its B2B strategic partners on the B2smart journey, to fully automate bulk fuel delivery related processes and continuously offer quality products and services.

This journey consists of three level transformation as follows:

1. Smart Ordering
2. Smart Site Solutions
3. Smart Reports

Smart Ordering

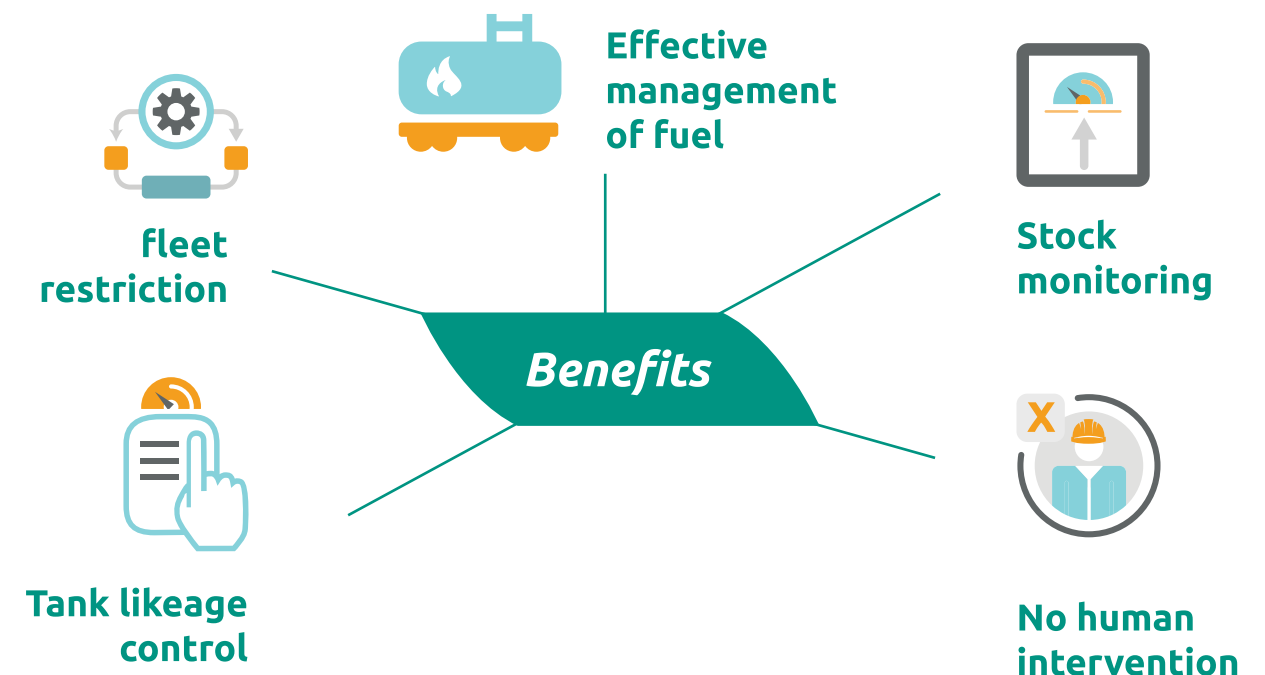

Oman Oil Marketing has developed an online platform and mobile app for fuel ordering.

Smart Site Solutions

A commercial station will be installed at the sites of strategic partners, with fully automated digital devices and solutions such as:

- Electronic dispenser
- Digital meter in the tank
- RFID chips installed on the equipment or fleet of the strategic client
- Tanks automatically order when the product level is low

Smart Reports

In the final stage of automation, Oman Oil Marketing fuel monitoring system will be able to provide sophisticated reports and analysis for its strategic partners about key business indicators.

- Consumption rate by time and date
- Frequency of filling
- Fuel related expense budgeting
- Preliminary alerts in case of any abnormal consumptions of fuel

The ultimate benefits of the above smart solutions is that we manage for our partners all fuel related matters so that they focus on their operations.

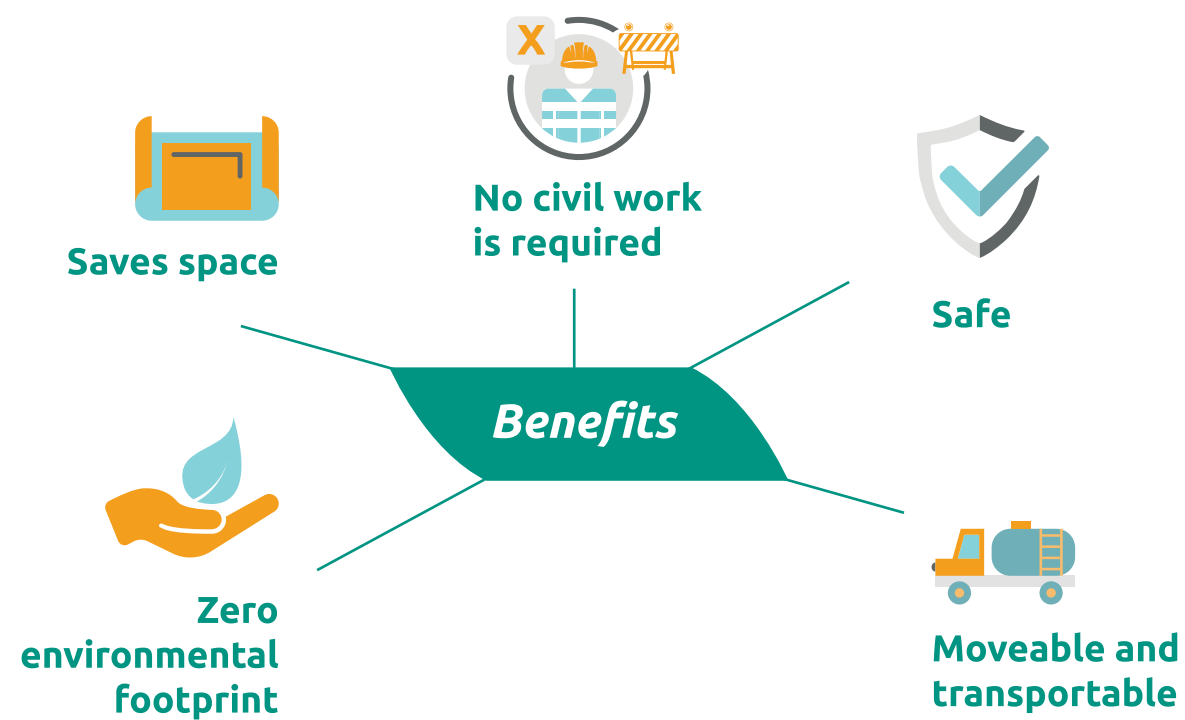

Smart Storage Solutions

Oman Oil Marketing offers a range of options for optimal tank solutions depending on the needs of the strategic partner.

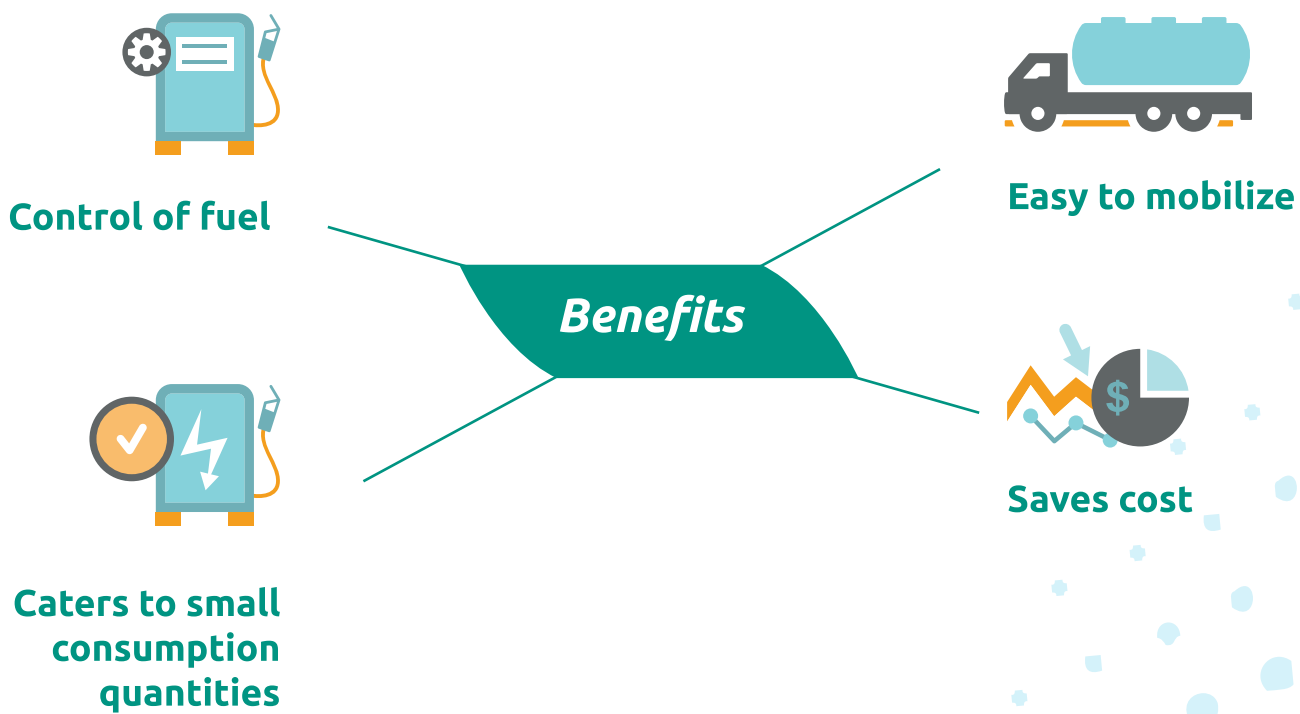

Containerized station

This is an automated all-in-one filling station in a container comprising a tank with a built-in dispenser.

Cubes containerized station

A small automated all-in-one filling station in a cube comprising a tank with a built-in dispenser.

Mobile Tankers

It is a tanker that is installed with a fuel dispenser. Useful for companies which have projects that are not based in one location but require access to fuel in their various locations. Mobile tankers can be dispatched to these various locations to fuel the equipment or trucks of our strategic partners.

Distribute small quantities

Benefits

Remote location reachability

Saving truck time, as no need to commute to a service station

Health, Safety, Environment and Quality Assurance (HSEQ)

Oman Oil Marketing, through a dedicated HSEQ department, ensures implementation of the highest HSEQ standards. This is achieved by executing safety visits and inspections before delivering fuel. The company puts huge efforts into reducing any environmental footprint and an assurance of delivering high quality services to its clients.

Our Products

Oman Oil Marketing is a provider of a wide range of products for commercial applications including:
